

AI Career Accelerator for Women

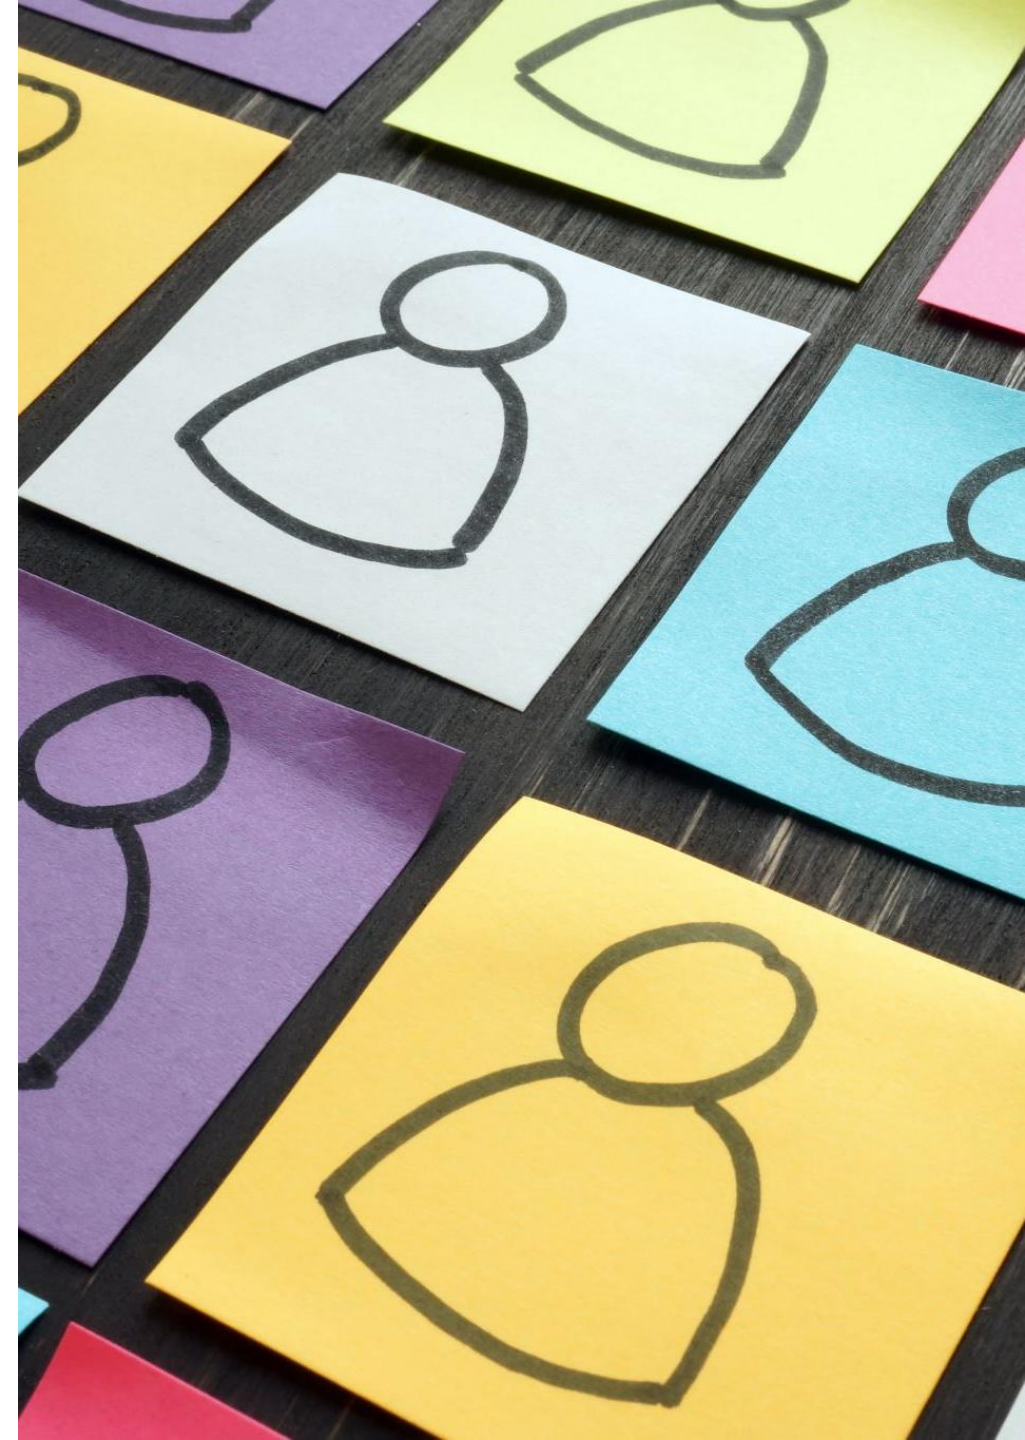

Empowering Women to Restart, Rebuild, and Thrive in the AI Era.

Week 2 – Prompt Engineering

Agenda

- Anatomy of a good prompt
- Giving context
- Assigning personas
- Using examples
- Refining prompts iteratively
- Common mistakes

Introduction to Prompt Engineering

Prompt Engineering is the skill of communicating with AI effectively to get accurate, relevant, and useful responses.

Why does it matter?

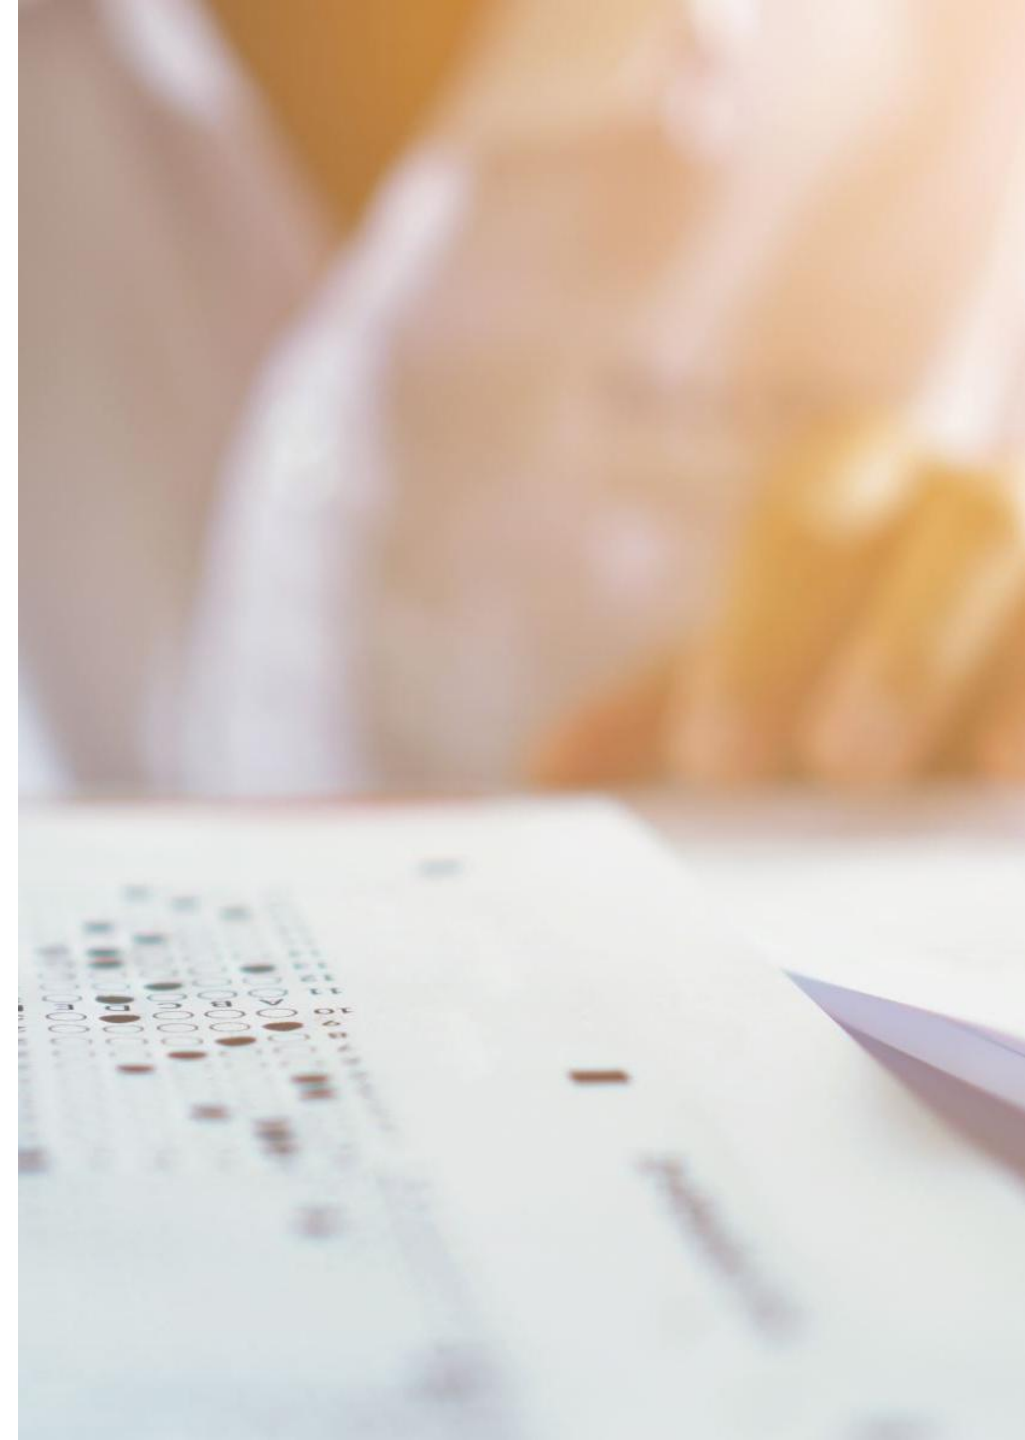

- Better prompts produce better results
- Saves time by reducing rework
- Improves quality and consistency
- Helps AI understand your intent
- Essential skill for every profession

Anatomy of a Good Prompt

Component	Example
Goal	Write a project proposal
Context	For a property management company
Audience	Senior management
Format	Executive summary with bullet points
Tone	Professional and persuasive

Prompt - Example

- ❌ Write a report.
- ✅ Write a one-page executive report for senior management summarising the benefits of implementing AI in HR using professional language and bullet points.

Giving Context

- Background
- Business purpose
- Audience
- Constraints
- Desired outcome

Assigning Personas

- 🧑 HR Manager
- 🧑 Marketing Consultant
- 🧑 Career Coach
- 🧑 Financial Advisor
- 🧑 Software Architect

Using Examples

Instead of explaining... Provide an example.

Example

- Here is an example of a professional email.

Dear Sarah,

Thank you for meeting with us yesterday.

We will send the project plan by Friday.

Please let us know if you have any questions.

Kind regards,

John Smith

- Write another email using the **same professional tone and structure** to confirm that a customer has successfully completed their training course.

Refine Prompts Iteratively

AI is a Conversation

Iterate, refine, and get better results

Common Prompting Mistakes

- ✗ Too vague
- ✗ No context
- ✗ Too many requests at once
- ✗ No audience
- ✗ No desired format
- ✗ Trusting AI without verification

Remember

- Good prompts save time.
- Great prompts create great results.

Prompt Engineering Cheat Sheet

Technique	Ask Yourself
Define the goal	What do I want AI to do?
Give Context	What background does AI need?
Assign a Persona	Who should AI act as?
Provide Examples	Can I show AI what good looks like?
Refine Iteratively	How can I improve the response?
Review the output	Is the answer accurate and complete

Prompt Makeover

✗ Bad Prompt

Write a report.

Can You Improve It?

Think about:

- ✓ Goal
- ✓ Context
- ✓ Audience
- ✓ Format
- ✓ Tone

You are a Project Manager. Write a one-page executive report for senior management summarising the benefits of adopting AI in our HR department. Use clear headings, bullet points, and a professional tone.

Key Takeaways

-  AI is a conversation, not a search engine.
-  Better prompts produce better results.
-  Provide context instead of making AI guess.
-  Give AI a role or persona.
-  Show examples whenever possible.
-  Refine prompts until you're happy with the output.
-  Always verify AI-generated information before using it.

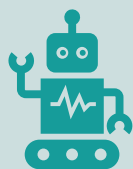

Quote for the Module

Don't expect perfect answers from your first prompt.
Great AI users create great results through better
conversations.

Questions and Discussion

Questions

How could Prompt Engineering help you in your current role or daily work?

How could you use personas and examples to improve AI responses in your profession?
